

**CITY OF GLENDALE 2011-2012 ON-CALL CONSULTANTS (Effective 01/01/11-12/31/12)**

The City of Glendale recently developed an On Call Consulting Services list to provide general engineering design and construction administration services. This list will be in effect for a two year period. The following twenty-four (24) consultants have been selected, and at the inception of a qualifying project, the firms will be randomly selected to perform these services.

| CONSULTANT NAME                 | PROJECT TYPE        |                  |         |              |            |              |            |            |                  |
|---------------------------------|---------------------|------------------|---------|--------------|------------|--------------|------------|------------|------------------|
|                                 | General Engineering | Water/Wastewater | Roadway | Architecture | Electrical | Geotechnical | Mechanical | Structural | Public Relations |
| Arrington Watkins Architects    |                     |                  |         | X            |            |              |            |            |                  |
| Michael Baker Jr., Inc. (Baker) |                     |                  |         |              |            |              |            |            | X                |
| Burgess & Niple, Inc.           |                     |                  | X       |              |            |              |            |            |                  |
| Burns & McDonnell               |                     |                  |         |              |            |              | X          |            |                  |
| Caruso Turley Scott Inc.        |                     |                  |         |              |            |              |            | X          |                  |
| Coe & Van Loo Consultants, Inc. | X                   |                  |         |              |            |              |            |            |                  |
| CR Engineers Inc                |                     |                  |         |              | X          |              |            |            |                  |
| Dibble & Associates             |                     |                  | X       |              |            |              |            |            |                  |
| DWL Architects                  |                     |                  |         | X            |            |              |            |            |                  |
| Energy Systems Design           |                     |                  |         |              |            |              | X          |            |                  |
| Entellus, Inc.                  |                     | X                |         |              |            |              |            |            |                  |
| GHD, Inc.                       |                     | X                |         |              |            |              |            |            |                  |
| Kimley-Horn & Associates, Inc.  | X                   |                  |         |              |            |              |            |            |                  |
| KPFF Consulting Engineers       |                     |                  |         |              |            |              |            | X          |                  |
| LSW Engineers Arizona, Inc.     |                     |                  |         |              | X          |              |            |            |                  |
| MakPro Services, LLC            |                     |                  |         |              |            |              |            |            | X                |
| Malcolm Pirnie, Inc.            |                     | X                |         |              |            |              |            |            |                  |
| Premier Engineering Corporation | X                   |                  |         |              |            |              |            |            |                  |
| Primatech, LLC                  |                     | X                |         |              |            |              |            |            |                  |
| Ritoch-Powell Associates        |                     |                  | X       |              |            |              |            |            |                  |
| Speedie and Associates          |                     |                  |         |              |            | X            |            |            |                  |
| Stanley Consultants, Inc.       |                     |                  | X       |              |            |              |            |            |                  |
| Strand Associates, Inc.         | X                   |                  |         |              |            |              |            |            |                  |
| Terracon, Inc.                  |                     |                  |         |              |            | X            |            |            |                  |

- ◆ **General Engineering** – This category includes site grading and drainage, area drainage master studies, pavement management, large, and small area GIS/Mapping. Includes groundwater recharge with associated on-site conveyance systems, drainage issues, Storm Water Pollution Prevention Plans (SWPPPs), storm drain design, hydrology and hydraulic analysis for storm drains, flood plain mapping, water system modeling studies, and construction administration (RFIs, inspection, as-builts). This category will include survey services – boundary surveys, construction staking, legal descriptions, as-built surveying, and topographic surveys. Landscape Architectural services are included in this category.
- ◆ **Water/Wastewater** - Includes projects related to waste water treatment plants, sanitary sewer lift stations, treated effluent pumping systems, and transmission and distribution systems, as well as pumping, storage, and distribution and transmission systems for potable water.
- ◆ **Roadway** –This includes design of new signal installations, or modifications to existing signals as part of street or intersection improvement projects. This would also include right of way acquisition and easement development, surveying, landscape design, median work and some street/roadway design. This category will include striping, signage, and some traffic signal design.
- ◆ **Architectural Design** – Includes planning, design and oversight of the construction of facilities, develop architectural drawings, designs, and specifications.
- ◆ **Electrical Engineering** – This includes instrumentation & control for water and wastewater. Street lighting/ pedestrian lighting, ITS facilities, and general site electrical.
- ◆ **Geotechnical Engineering** – Includes geotechnical reports, materials testing, subsidence investigations and reports, and in general geotechnical designs, installations, geotechnical special inspections, and forensics.
- ◆ **Mechanical Engineering** – Includes HVAC, plumbing, and gas site work.
- ◆ **Structural Design** – Includes structural ratings, bridge and building designs, and special inspections.
- ◆ **Public Relations Consultants** – Includes Public Information services for City Capital Improvement Projects and Programs. The consultant will handle public announcements, public meetings, newsletters, door hangers, door to door contact with the public, phone hotlines, and web hotlines.
